

ORGANISATIONAL BROCHURE / OCTOBER 2026

Living Well Hubs

Distinct health and wellbeing platforms, designed around different lives.

**INFORMATION
COACHING
COMMUNITY**

People. Innovation.
Better outcomes.

ORGANISATIONAL OVERVIEW

One portfolio. Distinct platforms.

Independent by design

Living Well Hubs form a modular portfolio of independently designed standalone platforms. Each has tailored functions, product-specific licensing, accounts, access arrangements and administration.

Women's health and specialist needs

The portfolio includes the Women's Health Hub and specialist platforms for defined needs and populations, including FND. Organisations select the platform relevant to their population and intended outcomes.

Practical everyday support

Depending on the platform and commissioned scope, resources can include evidence-informed Guides, trackers, appointment preparation, local navigation, communication support and self-management tools.

ORGANISATIONAL OVERVIEW

The right depth of support.

Tier 1: continuing resources

Commissioned information, practical tools and local resources support eligible residents within the relevant Hub.

Tier 2: targeted enhancement

Time- and pooled-quota-limited coaching enhances the same resident account within that Hub. When the entitlement ends, enhanced coaching pauses and the account steps down to funded Tier 1 resources.

Tier 3: shared learning

Commissioned sessions and suitable recordings can extend access to learning. Availability and access through Tier 1 are agreed with the buyer.

Implementation and evidence

Agree local configuration, capacity, support, governance and evaluation. Existing product functionality is demonstrated; NHS deployment requires applicable assurance and commissioner agreement.

A CONVERSATION ABOUT YOUR PRIORITIES

Better access. Practical innovation. Lasting possibilities.

Explore a demonstration, a scoped paid pilot or an organisational licence and implementation partnership.
