

ORGANISATIONAL BROCHURE / OCTOBER 2026

Living Well Partners

Evidence-led innovation. Practical implementation. Better access.

Supporting healthier people,
stronger organisations
and fairer communities

People. Innovation.
Better outcomes.

ORGANISATIONAL OVERVIEW

Research-led. People-centred.

Our purpose

Living Well Partners develops practical digital products and service approaches across health, wellbeing, inclusive employment, leadership and organisational improvement.

Founder expertise

Founded by Dr Julie Winstanley, a psychologist and researcher with experience across higher education, public services, needs assessment, evaluation and applied innovation.

Evidence into action

We work from the problem to a practical response: understand the evidence, design and test, implement proportionately, evaluate and improve. Accessibility and lived experience inform the work.

ORGANISATIONAL OVERVIEW

Distinct products. Relevant support.

Living Well Hubs

A modular portfolio of independently designed standalone health and wellbeing platforms. Each has tailored functions, its own licensing and defined access arrangements.

Right Work For You

Contextual Capability helps people explore strengths, work demands, enabling conditions and practical next steps for better-fitting work.

Leadership Development

Structured reflection, scenario-based learning and applied improvement connect development to everyday organisational challenges.

Service Operations Centre

A separate operational platform supports contracts, workforce availability, appointments, venues and regional service coordination.

ORGANISATIONAL OVERVIEW

A partnership shaped around your priorities.

Research and evaluation

Commission needs assessment, evidence reviews, research and evaluation design, data interpretation and improvement-focused reporting.

Implementation and service design

Explore funded pilots, organisational licensing and practical implementation. Wider delivery may combine digital products, trained professionals and local partners under an agreed scope.

Education and supplier development

Discuss innovation learning, supplier-development consultancy, capability websites and protected supplier portals.

A proportionate starting point

Begin with a demonstration or scoping conversation. Agree the users, outcomes, responsibilities, budget and evaluation before proceeding. Products remain independently licensable; benefits are tested rather than assumed.

A CONVERSATION ABOUT YOUR PRIORITIES

Better access. Practical innovation. Lasting possibilities.

Explore a demonstration, a scoped paid pilot or an organisational licence and implementation partnership.
